

## **Courses Offered**

We conduct the following short courses:-

- a) The Theory, Design, Operations and Maintenance of Centrifugal Pumps;
- b) The Theory, Design, Operations and Maintenance of Positive Displacement Pumps;
- c) The Theory, Design, Operations and Maintenance of Air Compressors;
- d) An Introduction to Cleanroom Facilities and Technologies;
- e) Facilities Management for Plant Engineers.

And many other courses related to engineering. For further information, please contact [training@plantmac.com](mailto:training@plantmac.com)
